

Trippin' the lovelight fantastic

Get ready now, rocksteady rock
To the beat nonstop, keep your moves locked
Tight in sync with the tic toc
The rhythm eternal of the cosmic clock
Celestial harmonies building up
Soak up the sound, sip it up
When your body starts movin like a robot
All by itself, then let it drop
And lift your spirit up
Lift it way up high
Lift your spirit up
Let it fly, give it up
Get lost, let your mind spin like a dervish
Lovedrunk, soul blazin hot like a furnace
Burn it all down now don't get nervous
Rock the foundation like twilight circus
Shed your epidermis, flow like Kurtis
Blow until nothing's left but the Purpose
Let go of everything that's worthless
Show whatcha got beneath that surface
Float with me like an OBE
Straight outta this world like ODB
Shimmy-shimmy-ya til the soul is free
Dancing to theta brain frequencies
We're trippin the lovelight fantastic
